

Semester and/or Full Year

- Core courses are semestered. You can choose whether you want to take non-core courses full year or by semester. You will focus on a couple of core each semester.
- Here's an example:

1 st Semester	2 nd Semester
English	Social
Math	Science
Phys.ed	→
Music	→
CTS Foods (3 modules)	CTS Career Transitions (1 module)

To complete high school in the traditional three years, one plans on taking 30-35 credits/year. (15-18 credits/semester)

Most students will take two core courses/semester.

Some courses, such as phys.ed and music, have activities that you may do all year so choosing 'full year' is common.
